PYLON

WEST VIRGINIA UNIVERSITY

SCHOOL OF MEDICINE

Dedication

The West Virginia University Medical School Class of 1994 is proud to dedicate this Pylon to a physician who exemplifies the best qualities of those who practice the art of medicine:

Herbert E. Warden, M.D.

Dr. Warden received his undergraduate degree from Washington And Jefferson College in 1942. He then pursued his medical education at the University of Chicago, graduating in 1946. His career path was interrupted by a tour of duty in the U. S. Navy, serving as a medical officer at the Mare Island Naval Hospital in California during World War II. His surgical training was undertaken at the University of Minnesota in 1951. It was there that he was part of the four man team to successfully perform the first open heart surgery using the revolutionary concept of cross circulation in 1955. In 1960, shortly after West Virginia University established a four year medical school, Dr. Warden joined Dr. Bernard Zimmerman, the newly appointed chairman of the Department of Surgery, to establish the first cardiovascular thoracic surgery program in the state. He diligently served as head of this section for the next twenty-two years and continues to contribute today as a surgeon, professor and mentor.

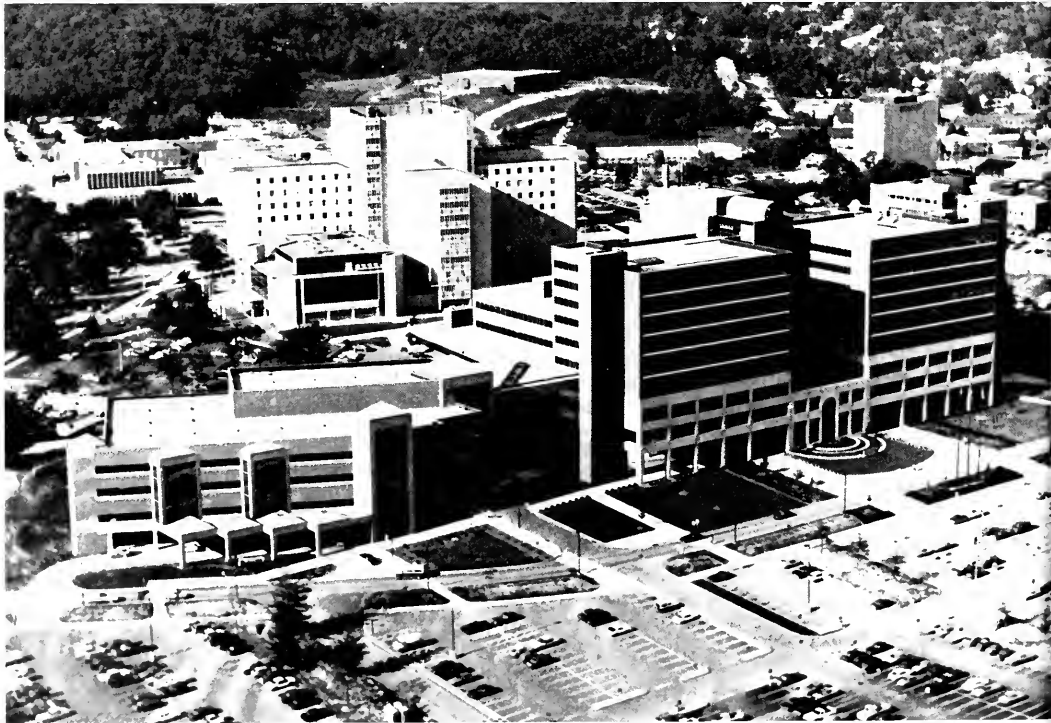

Dr. Warden has received numerous honors and awards. These include Alpha Omega Alpha, Sigma XI, the Albert Lasker Award for Medical Research for " Pioneering Research in Open Heart Surgery " presented to him by President Eisenhower in 1955, the American Medical Association's Hektoen Gold Medal Award and Citations of merit in both 1955 and 1958, the J. Maxwell Chamberlin Award in 1985 from the Society of Thoracic Surgeons, of which he is a founding member and multiple other region and national awards.

However, Dr. Warden's career can not be characterized by honors and awards alone. He is a humanist, respectful and sensitive in the manner in which he interacts with his patients and their families. He is an educator, calm and supportive of those under his instruction. He is a clinician, deliberate and confident in his diagnosis. He is a surgeon, meticulous in the performance of his craft.

I have been fortunate to know him not only as the compassionate, tireless surgeon and instructor but also as a loving husband to his wife, Audrey and a caring father to his children, Karen, Douglas, Suzanne and I. We are truly proud of his accomplishments both in and out of the operating room.

It is therefore with great pride and respect that we dedicate this pylon to him.

WVU Hospitals And Health Science Center

CAMC

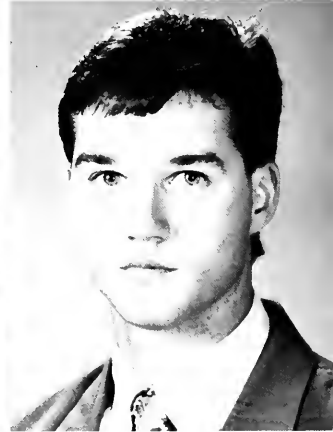

CLASS OF 1994

Hippocrates, known as "The Father of Medicine" was the original patient advocate, admonishing "Primum non nocere," (First, do no harm.) Aristotle sits beneath him in the panel comparing the bony structures of different animals. He first proposed the idea of species - fixed sets in nature that would reproduce true to lineage.

David Artz M.D.

Marc Baumgard M.D.

Robert Blake M.D.

"Mom, Dad and especially my wife Terri . . . thanks for your love and support"

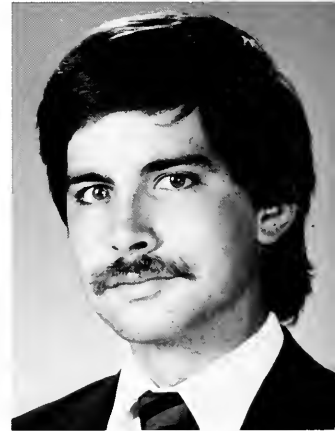

Brad Brautigan M.D.

Kimberly Bruno M.D.

John Burkard M.D.

Camille Castaldo M.D.

This one's for you, Dad!!

John Casto M.D.

Ada Conway M.D.

Me with my favorite MS III during my favorite season

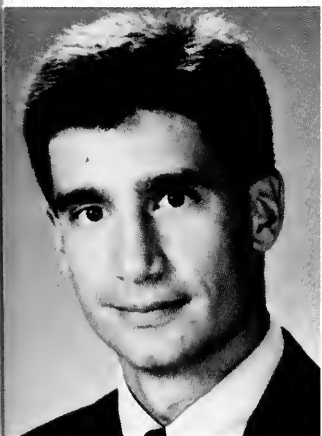

Matthew Cupp M.D.

David Currence M.D.

Matthew Darmelio M.D.

Angela Doss M.D.

Gary Frazier M.D.

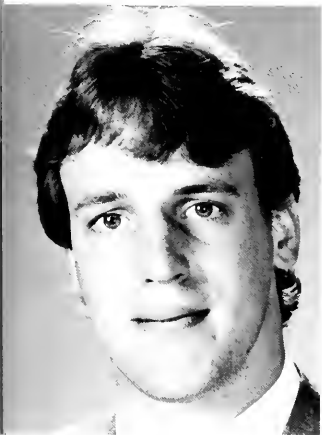

Huey Fu M.D.

Huey takes some time off from Radiology at the UVA.

John Timothy Garner M.D.

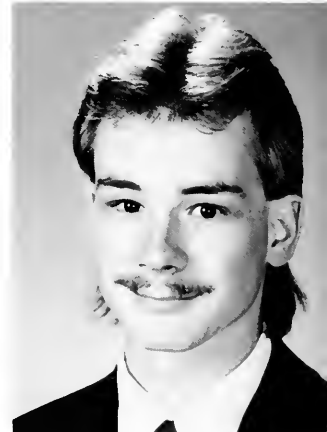

Parabh Gill M.D.

With love and thanks to Dad for his dual role as disciplinarian and compassionate listener, Mom for stressing education and for carrying my worries and fears, to my sister and brother for their confidence and friendship, and to God, from whom all blessings flow.

William Neal Harmon M.D.

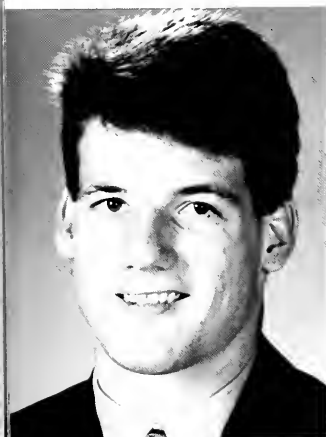

Holly Hartman M.D.

Give me some loving!

CLASS OF 1995

The top of this panel comes from Exodus 30:25. "And thou shalt make it an oil of holy anointment, an anointment compound after the art of the apothecary . . ." Centuries later, the mortar and pestle remain the symbol of the pharmacist. The bottom depicts the teachings of Leviticus from the old testament of the Bible. It legislated sanitation, personal hygiene, and food preparation.

Dissection and anatomical illustration during the Renaissance are depicted in this panel. Andreas Vesalius elevated anatomy to a science when he authored the first anatomy book based on human dissection. This was counterposed to the teachings of Galen, based on dissections of animals.

William Harvey studied blood and its movement through the vessels and heart. Without the aid of the microscope he postulated the existence of capillaries — later proven by Malpighi. Below, Stephen Hales was a brilliant British plant physiologist who was also interested in the pressure exerted by blood. He measured blood pressure by cannulating the vessels of various animals with a graduated glass tube.

GRADUATION

Ephraim McDowell 1771-1830 treating tumor of the ovary by the first removal of this organ.
Ignaz Semmelweis 1818-1865 instituted methods of preventing childbed fever, thus saving the
lives of thousands of mothers.

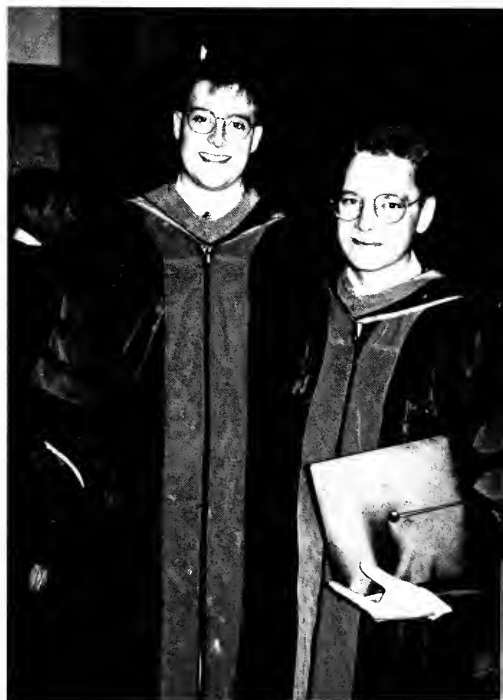

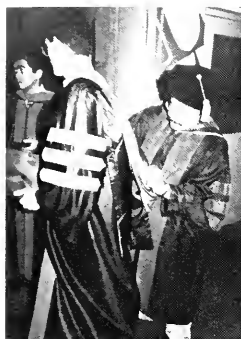

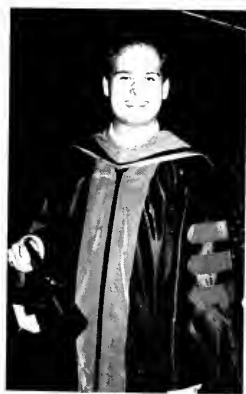

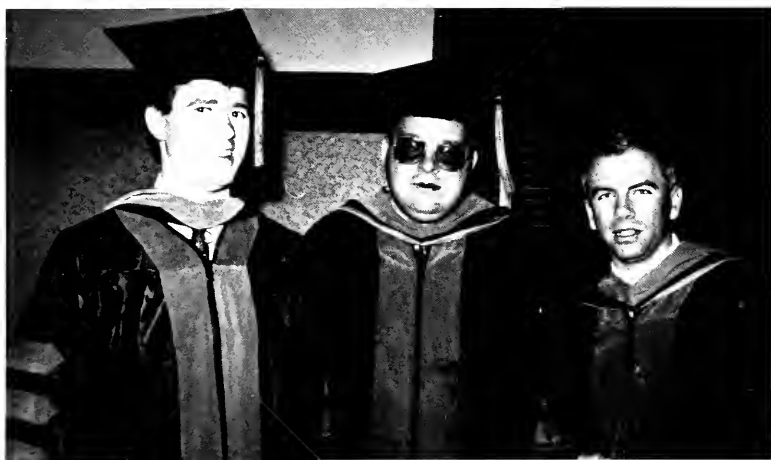

Advertisements

The American William Beaumont (1785-1853) advanced physiology by his study of the digestive processes in the living stomach of Alexis St. Martin after a healed shotgun wound left a permanent opening. Wilhelm Roentgen (1845-1923) discovered the X-ray in 1895. The panel shows the fluoroscope which uses X-ray in the examination of the interior of the living body.

To The Class Of '94

WVU School of Medicine

Congratulations on reaching this important goal in your educational and professional development.

As you prepare to enter practice, remember the West Virginia State Medical Association is behind you and ready to provide all possible assistance to help you fulfill your dreams.

Now, more than ever, it is important to have a "medical voice" to influence legislation and public opinion on health care issues. The WVSMA gives you the opportunity to get involved.

For just \$10, you can become a member in WVSMA/Medical Student Section and the WVSMA will automatically pay your AMA dues for 1993.

Membership in these organizations provides an active outlet for you to work with other health care providers to help determine how medicine will be practiced in the future. Join today. For more information, contact Donna Webb at 925-0342.

"Being involved in the process and being organized can mean the difference between being in control and being controlled."

James L. Comerci, M.D.

Since 1973 we've been a textbook example of leadership.

For nearly two and a half decades, our fully accredited, three year residency program has been providing a strong foundation in total family medicine education.

Our program will involve you in both inpatient and outpatient training to best prepare you for practice. Within the Hospital, we run a very active inpatient Family Practice Service, entirely controlled by our residents, thus maximizing the learning opportunities available in a supervised, hands-on setting.
